General Information

To Join Squares: Hold two squares together, matching corners and loops and taking care that patterns will be in correct position when joining is completed. With matching yarn, sew over and over, taking 2 stitches over each double loop. The yarn left on the square after weaving is used for sewing. When using a new length of yarn, weave the loose end into

previous seam for 1", draw needle through 2 loops of next seam and tie a slip-knot, then continue across loops of next seam. Finish off loose ends neatly by working them into seams on wrong side.

Pressing: Press each section carefully through a damp cloth before assembling more than one section. Press all seams on wrong side through a damp cloth, taking care to keep squares straight.
