WEAVE-IT for BABY

A glance through this book should convince you beyond doubt that WEAVE-IT is the ideal way to make baby blankets, afghans, carriage robes and baby sets. The pieces in this new book were designed by Miss Dorris Whiteside, America's foremost Weave-It designer and were made on the Weave-It by her.

Even without previous experience, you, too, can make all of these lovely things easily and as beautifully as Dorris has. And when you have finished any or all of them and discover how little they cost, you'll readily understand why *wise women everywhere WEAVE-IT* for themselves and for gifts.

How to Sew and Assemble Weave-It Squares

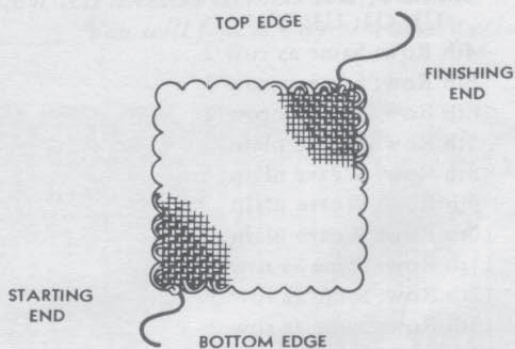

FIG. 1

1. Be sure you know the *right* side of the square. To determine the *right* side, hold square so that starting end is in lower left hand corner, finishing end in upper right hand corner. The side of the square facing you is the *right* side. (See figure 1.)

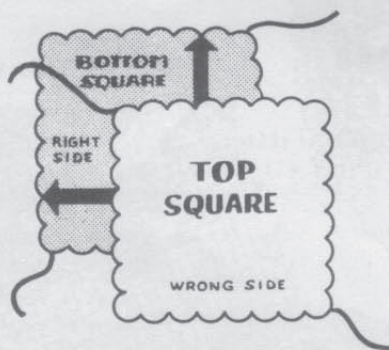

FIG. 2

2. Place two squares together, right side to right side. The front square with the bottom edge up, the back square with the top edge up. (See figure 2.)
 3. Line up the edges of the squares so that the double loops of the rear square appear *between* the loops of the front square.

FIG. 3

The squares in this illustration were stretched to emphasize the path of the joining thread.

4. Thread the long finishing end and feed through the first loop of the front square, then through the first loop of the back square. Use an over and over stitch, *two stitches* to each pair of loops, all the way across the squares. (Figure 3 shows how thread goes through loops.) You'll find three loops at the extreme left of the square (caused from winding the Weave-It). Tie a slip knot when making last stitch. Do not draw yarn too tight when sewing squares together. Yarn used for sewing two squares together may also be used for sewing strips together.

To Crochet or Knit Around Squares

When crocheting around squares take stitches only through the loops. In turning corners make two stitches in same loop. When picking up stitches, be careful not to pull loops. Using a needle, take yarn from ball and pull a stitch through each loop. When stitches are all picked up, you may start knitting.

GENERAL INSTRUCTIONS

When making an afghan or garment, use the same interlocking sewing method and sew squares into strips.
 Fill corners by making a stitch through the finishing off slip knots.
 Bury loose ends by weaving them back an inch or so on wrong side.
 Split all four-ply yarns before finishing ends.
 When using new or different color yarn for sewing squares together, weave in the loose ends left on the square and tie a slip knot before starting.
